

ENVIRO PLUS

Enviro Plus hydraulic fluid provides an environmentally safe solution for equipment operators working in environmentally sensitive areas. Blended using quality vegetable base stocks, this hydraulic fluid carries a high viscosity index which can be used in industrial, marine and forestry equipment. It protects against corrosion, oxidation, wear and scuffing. Enviro Plus is 100% biodegradable and passes the Environment Canada's EPS1 requirement, the Non-Toxic Aquatic Toxicity test and the USDA's bio based product Executive Order 13101. Using Enviro Plus prevents risk of major liability and claim if a spill were to occur.
